£365,000

Danum Homes presents a rare opportunity to own one of just ten individually crafted residences, set within the prestigious village of Wistow, bordering York & Selby.

### The Vines, Wistow

Construction is now underway on Plot 1 – The Blackthorne, an impressive contemporary detached dwelling thoughtfully designed to combine modern living with practical comfort. Occupying a generous plot and complemented by a single garage, this exceptional home offers well-proportioned accommodation in an attractive village setting.

The Vines is an exclusive development of just 10 individually designed detached homes, situated within the sought-after village of Wistow. Surrounded by open countryside and farmland, the village enjoys a peaceful rural setting whilst remaining conveniently positioned less than three miles north of Selby, approximately 12 miles from York, and 23 miles from Leeds.

Sustainability has been a key consideration throughout the design and specification of each home. Advanced air source heat pump technology, high-performance insulation, double-glazed windows and electric underfloor heating to the house bathroom and ensuite combine to deliver excellent energy efficiency alongside year-round comfort.

The high-quality specification includes as standard quartz worktops, landscaped and lawned gardens to both the front and rear, and an EV charging point, ensuring each home is as practical as it is stylish.

Developments of this nature are exceptionally rare within Wistow, where opportunities for new residential development are few and far between. As one of the first significant residential schemes to be delivered in the village for over two decades, The Vines presents a unique opportunity to acquire a thoughtfully designed, energy-efficient home within an exclusive collection of just ten properties. Combining modern living with quality craftsmanship, it offers an enviable lifestyle in one of the area's most sought-after village locations.

Construction of The Vines is now in progress, with completion of the development anticipated around early spring 2027.
